Question related to:	EN/prEN:	Other:	
Annex:	Article:	Clause:	
Key words: toe protection			
Question: §5.3.2.3 « measure to the nearest 0.5 mm the lowest height....» 0.5mm is a very poor accuracy. All the labs are able to measure to the nearest 0.1 mm. 13.8 mm obtained for the size 42 , is this result acceptable or not ?			
Solution: the standard deviation is about $\pm 1$ mm. The standard deviation has to be taken into account and not the accuracy of the measurement apparatus. the measurement must be rounded up to the nearest 0.5 mm, that means 13.8 mm is 14.0 mm and this result is acceptable.
