		<input type="checkbox"/> Standing Committee	
Question related to:	EN/prEN: EN 344, EN 12568	Other:	
Annex:	Article:	Clause:	
Key words: Testing of insert			
Question: According to EN 344 and/or EN 12568 is it necessary to test the flexion on non-metallic anti penetration insert? Neither EN 12568 nor prEN ISO 20344 clearly state which the procedure or the test methods are to be carried out in the case of safety footwear with non metallic, penetration resistant inserts.			
Solution: No difference is noticed in the standards, on metallic and non-metallic anti penetration insert. Therefore for both, flexion shall be tested.			
Sent to: <input checked="" type="checkbox"/> members of the VG <input type="checkbox"/> other(s) VG <input checked="" type="checkbox"/> HC (2) <input checked="" type="checkbox"/> TC (3) <input type="checkbox"/> SC (4) <input type="checkbox"/> other (5)			

(1) Essential safety requirement
(2) HC = horizontal committee

(3) N° of CEN/TC (Secretary & Chairman)
(4) EEC Standing Committee 89/392

(5) To be specified
