Question related to: Directive 89/686/EEC	EN/prEN: EN 345-347	Other:	
Annex:	Article:	Clause:	
Key words: Class II footwear			
Question: A footwear manufacturer asked us if we could consider as class II, a boot with an upper made from a synthetic, non permeable material, bonded to a rubber or PU sole that meets all the basic requirements of this type of footwear. The same question could be raised in the case in which the upper is made of coated split leather that does not meet the permeability and water vapour coefficient requirements			
Solution: Classification II is clearly defined in the standard. The products described above do not comply with the standard. However they can be CE marked according the essential requirement of the directive.
