Question related to: Directive 89/686/EEC	EN/prEN: 20345	Other:	
Annex:	Article:	Clause:	
Key words: Tests on half length insocks			
Question: During the discussion about prEN ISO 20345-7 it was decided not to test the properties of insocks on these half length insocks. However, in our opinion both the pH and hexavalent chromium should be tested as they are related to the users' health and not to the component performance.			
Solution: The standard EN ISO 20345 does not request to test half insock on line 2 of table 3. VG 10 notified bodies request to test the innocuousness of the leather half insock : pH and CrVI.
