Question related to: Directive 89/686/EEC	EN/prEN: EN ISO 20345,6,7	Other:	
Annex:	Article:	Clause:	
Key words: Upper overlay			
Question: In the context of this question, an “overlay material” is a component of the footwear upper that is only present in areas where there is a second (underlying) material that fully complies with the requirements of EN ISO 20345:2004 Clause 5.4.			
Question : What testing should be carried out on an “overlay material”?			
Solution: Overlay materials above the height defined in EN ISO 20345 Table 7 – As they are not an insert it could be argued that no testing is required.			
Overlay materials below the height defined in EN ISO 20345 Table 7, the following shall be tested :			
<ul style="list-style-type: none">• Upper, all requirements of EN 20345/20346/20347 are applicable• Upper plus overlay material Water Vapour Permeability and coefficient
