Question related to:	EN 15090	Other:	
Annex:	Article:	Clause:	
Key words: Chemical boots			
Question: EN 15090 clause 6.5 refers to prEN 13832-3: 2004 for chemical tests, (if you remember there were 5 categories of chemicals in this prEN with 3 chemicals in each, you must pick one category & the boot must pass all 3 chemicals in the category.) In the meantime, EN 13832:2006 has been published where there is list of 13 chemicals & you must pass at least 3 of these. Should the chemical tests be done in accordance with prEN 13832-3: 2004 as specified or EN 13832-3: 2006 ?			
Solution: The reference in EN 15090 Clause 6.5 is to table 4 of prEN 13832-3. However, table 4 in prEN 13832-3 is to do with insoles and footbeds. In this instance we would use EN 13832-3: 2006, we believe that this was the original intention of the Technical Committee and in which case the Table 4 reference is correct			
Sent to: <input checked="" type="checkbox"/> members of the VG <input type="checkbox"/> other(s) VG <input type="checkbox"/> HC (2) <input checked="" type="checkbox"/> TC (3) <input type="checkbox"/> SC (4) <input type="checkbox"/> other (5)			

(1) Essential safety requirement
(2) HC = horizontal committee

(3) N° of CEN/TC (Secretary & Chairman)
(4) EEC Standing Committee 89/392

(5) To be specified
