		<input checked="" type="checkbox"/> Horizontal Committee	13/09/2011
		<input type="checkbox"/> Standing Committee	(date)

Question related to: : Metatarsal Protection	EN/prEN:	Other:
Annex: Article:	Clause:	

Key words:
: Metatarsal Protection

Question:
If the wax test form breaks during test, how do you assess the result - fail because of the damage or passed, if the vertical height fulfills the requirements

Solution:
The requirement of the standard is the final height so if the break means that you cannot be sure that the minimum height was accurately recorded the test must be repeated (perhaps using a softer wax)
