Question related to:	EN/prEN: EN ISO 20345-7	Other:	
Annex:	Article:	Clause: 5.4.1, 5.5	
Key words: Materials outside and inside			
Question: Question: EN ISO 20345-7, 5.4.1 deals with the outer part of the collar, but the inner part could be considered as lining with lining requirements. There are three possible cases: 1. There is the same material outside and inside of the collar 2. There are two different materials, but the inner materials is the same as for the lining 3. There are two different materials and different from the lining			
Solution: In all cases the minimum requirements are those from the collar (abrasion resistance and tear strength). When the inner material is the same as the lining it will fulfil the same as that lining.
