| Annex:                                                                                                                                                                                                                                                                                                             | Article:                        | Clause:                                                  |               |
| Key words:<br>Micro perforated material                                                                                                                                                                                                                                                                            |                                 |                                                          |               |
| Question:<br><br>A manufacturer used a material (textile or leather) for footwear upper. This material can be micro perforated or not but same quality<br>Is it possible to perform tear strength and abrasion resistance on the micro perforated material and to accept result for the non micro perforated one ? |                                 |                                                          |               |
| Solution:<br><br>It is recommended to test all material variants against each requirement                                                                                                                                                                                                                          |                                 |                                                          |               |
