Question related to	<input checked="" type="checkbox"/> PPE Regulation	<input type="checkbox"/> EN/prEN:	<input type="checkbox"/> Other:
Article:	Annex:	Clause:	
Key words: identification of test samples			
Question: What measures should be adopted to ensure traceability and identification of specific PPE product to the original type?			
Solution: There must be no ambiguity regarding the identification of the PPE having been submitted as a type (model) to a notified body for EU type-examination. PPE placed on the market are the subject of the tested type declaration of conformity.  The following is recommended: <ul style="list-style-type: none"><li>– the alphanumeric reference of the models must be provided by the manufacturer with an indication of its meaning</li><li>– the photographs needed for correct identification of the PPE must accompany the certificate and a copy of these photographs must be archived with the file by the notified body</li><li>– an example of the PPE model can be archived by the notified body when this is possible.</li></ul>
