Question related to: Winter Sports Protectors	EN/prEN: EN 1621-1: 2012 & EN 1621-2: 2014	Other:
Annex:	Article:	Clause:

Key words: Impact protectors for use in motorcycling AND skiing

Question:
Considering that no dedicated harmonised standard is currently available for back & limb protectors in winter sports: How to test and certify back & limb protectors intended not only for motorcycle use but also for use in skiing and snowboarding?

Solution:

Testing:
The protector must completely satisfy the requirements of EN 1621-2: 2014 and EN 1621-1: 2012, and in addition to full compliance with the relevant EN 1621 testing requirements being obtained for the mandatory ambient and wet impact conditions, additional impact testing at “- 20°C” and not “- 10°C” should also be carried out. The duration of the conditioning at -20°C shall be a minimum of 24 hours, and the testing shall be done at lab conditions within 5 min from the removal of the sample from the cold chamber.

Certification:
A common certification for use in motorcycling and winter sports is possible. The use of an additional “skier” pictogram can be accepted. The overall classification level claimed shall be based on the lowest impact performance level achieved for any of the pre-conditions during assessment.
